DISTRIBUTION OF HOURS

COMMUNITY SERVICE PROJECTS

January 2025 - July 2025

STUDENT TESTIMONIALS

“The most helpful and enriching part of the program are the professors. The Aliento professors are genuinely there to teach us about serving our communities and most share personal experiences of what they would have liked to know when they were in our position.”

“The integration of our culture, history, and current oppressive systems that impact the wellbeing of our clients are what’s enriching about the program”

“I really appreciated the coursework, discussions, and readings that focused on Latine individuals. The opportunity to connect across cohorts was also really nice to have and to experience.”

“I loved everything about the Aliento-specific courses, specifically the readings and applications to real-life scenarios. The professors made us students feel comfortable sharing any doubts or questions about applying interventions/theories, etc., to our communities. . . Additionally, the optional workshops and presentations have been so enlightening!”
