**VICTIMIZED OR VICTORIOUS
THE LONG-TERM EFFECTS OF CHILDHOOD SEXUAL ABUSE**

This workshop will educate participants about some of the long-term association of emotional, social, and physical symptoms as measured by the Trauma Symptom Inventory (TSI) and healthy sexual role development. Participants will become familiar with the TSI and its role in diagnosis and treatment of sexual abuse victims. The format will include brief lecture, slides and experiential exercises. Topics will include the prevalence of this type of victimization in the general population, specific mental disorders, including sexual dysfunction associated with early victimization, the role of secrets as they prevent the victim from seeking assistance, and the role of the counselor/therapist.
