"No child cares how much you know until they know how much you care." This presentation will help you understand why it is essential that you play with your child clients. Half of it will be hands-on exercises that will help children with emotional issues, the other half will be with a sound therapeutic rationale for this kind of work. Topics covered will include: Common themes in children play, why talk therapy alone doesn't help children, 4 stages in child therapy, universal treatment goals, and plenty of real-world examples.
