

CALIFORNIA EDUCATIONAL MFT STIPEND PROGRAM

Information on the 2012-13 MFT Stipend Program

The California Department of Mental Health (State) Educational MFT Stipend Program is funded through the Mental Health Services Act (MHSA) with the intent of addressing the statewide workforce need for mental health practitioners particularly in underserved communities.

MHSA

The mission of the Mental Health Services Act, enacted in 2005, is to transform California's public mental health delivery; in part, with mental health professionals dedicated to community service and to the care of those living with mental illness, by inspiring hope in their recovery, focusing on their personal strengths, respecting their cultural perspectives and learning from their lived experiences as consumers.

The goal of the State's Stipend Program consists of four objectives: 1. to recruit MFT graduates with the capacity to serve the culturally diverse needs of persons in mental health care, 2. to inform and prepare MFT graduates in the delivery of mental health services that promote wellness, recovery and resilience, 3. to recruit into MFT academic programs individuals who have experience in the public mental health system as consumers or family members of consumers, and 4. to promote public mental health as a career option for those entering the MFT profession. To reach its goal, the stipend program promotes curriculum development in MFT graduate institutions that prepares MFT graduates for public mental health practice as envisioned by the Mental Health Services Act.

Phillips Graduate Institute and the MFT Consortium of California

Phillips Graduate Institute (Chatsworth, CA) is the administrator of the statewide stipend program. To effectively implement this program, Phillips has partnered with regional consortia of MFT educational institutions and the MFT professional associations (CAMFT and AAMFT-CA). Each regional MFT Consortium represents the MFT graduate institutions in the counties within its region; some regional consortia include as members agencies that provide practicum training to MFT students. Each MFT Consortium has a host school that schedules regular meetings for its members. For a list of host schools and contact information go to www.pgi.edu and the MFT Consortium page.

Educational Stipends Awarded

Stipends will be awarded statewide with each of the eight regional MFT Consortium slated to receive a specific number of stipends. See page four for a list of the regional consortia and the number of stipends allocated to each region. The amount of each educational stipend is \$18,500 for use by recipients to defray the cost of their graduate education.

Eligibility Requirement

Students completing their graduate degree between July 1, 2012 and June 30, 2013 are eligible to apply. Completion of degree refers to the conferral date posted on the official transcripts. The degree must be from a graduate program that is an active member of a regional MFT Consortium. The degree obtained must qualify the students for registration as an MFT Intern with the California Board of Behavioral Sciences. Students must also qualify for employment in California.

Employment Commitment

Recipients of the State stipends will be required to commit one year of paid employment or volunteer placement as an MFT Intern at a mental health service agency operated by or affiliated with a county mental health department. Employment may be in a paid or unpaid position as a mental health clinician that qualifies for MFT Internship. The MFT Stipend Program at Phillips Graduate Institute, along with the regional MFT Consortium, determines if an agency and employment position qualify to fulfill the employment or volunteer placement obligation.

Qualifications

In general, students qualify for a state stipend if they are willing to provide services in underserved communities or in specialized programs that have been designated by local counties as high need areas for mental health practitioners. This would include geographic areas (rural or urban) and delivery programs within county mental health system that are funded through the MHSA (Full Service Partnerships, Wellness Centers, etc.). Academic knowledge or training in the principles espoused by the MHSA will contribute to a candidate's strong qualifications. These principles include recovery, wellness, client-driven care, outcome-driven services and consumer self-help support.

A list of qualifying capacities is provided on the next page to assist students in deciding if they are good candidates for the State Stipend Program. Consistent with the objectives of the State Stipend Program, applicants with practicum training in the treatment of serious mental disorders in underserved communities and to culturally diverse populations will weight greater in the selection process. As well, selection consideration will be given to students with bilingual / bicultural capacities that best serves the needs of these communities. The second language capacity needed in each region is included in the application form.

Application Information

The *2012-13 Application Form* and the *Guide for Completion of Stipend Application* will be available September 5, 2012 through the website of Phillips Graduate Institute (www.pgi.edu) under "MFT Consortium, California State Stipend Program." Each region's application form is modified to include the region's counties and threshold languages. The application process includes submission of the three parts of the *2012-13 Application Form* and the *W-9 Federal Tax Form*.

Application Deadline:

October 15, 2012

Applications postmarked after October 15, 2012 will not be accepted. There are no exceptions. Applicants will be notified via email of the receipt and eligibility of their applications after the application deadline and no later than Oct. 26.

Applicants should use the application form for the region they intend to fulfill their employment or volunteer placement obligation. Each region's application form identifies in Part II the second languages needed and lists the county or counties represented by that regional consortium. Applicants awarded a stipend are expected to fulfill the employment obligation as explained above by serving the workforce needs of the county or counties represented by that regional consortium.

Application Guidance from School Advisor

MFT students interested in applying to the State Stipend Program must contact the stipend representative of their MFT academic program. Students need to receive advisement from their school on their eligibility and qualifications for the stipend program. The faculty advising the student must sign the application form to verify the student's good academic standing and that the student will complete the degree between July 1, 2012 and June 30, 2013.

Qualifications

The applicants' level of qualification will be based on the categories listed below. Applicants are advised to adequately demonstrate their qualification in each category when completing Parts II and III of the application form. A highly qualified candidate should be able to convey in the application submitted her/his capacity in most, if not all, of these categories.

1. Public mental health service. Applicant has practicum training or employment experience in the public mental health delivery system of a county.
2. Second Language capacity. Applicant has the capacity to provide mental health services in a second language identified as a threshold language for that region. California Department of Mental Health defines "threshold language" as the primary language, other than English, for a high percentage of the population in a geographic region.
3. Bicultural / Multicultural capacity. Applicant has personal and/or employment experience in communities of diverse cultures, social economic statuses, and geographical settings.
4. Community orientation. Applicant has personal, employment and/or volunteer experience which conveys a high degree of commitment towards social justice and community service, especially in low-income and socially disadvantaged areas.
5. Career in public mental health. Applicant conveys a commitment to public mental health as a professional which is evident by practicum training in or prior employment at a public mental health agency and by articulating specific career goals in public mental health.
6. Public mental health preparation. Applicant has academic knowledge and clinical competence in providing services to the population served by the public mental health system.
7. Personal capacity. Applicant has personal strengths and skills which will enhance applicant's ability to integrate and apply knowledge and training to work in public mental health settings; such as personal experience with mental health stigma and the use of mental health care.

Stipend Awards Councils

All eligible stipend applications will be anonymously scored by a Stipend Awards Council established by each regional MFT Consortium. The Stipend Awards Councils includes members representing public mental health such as county and state personnel familiar with MHSA, county contracted agencies, community-based centers, professional organizations, and mental health consumers. Administrators and faculty of MFT graduate programs do not participate in any of the regional awards councils. After scoring the applications, the Stipend Awards Council will rank the applications and select those that will be awarded the stipends for its region.

The scoring rubric used by the awards councils is based on the information provided in the *Guide for Completion of the Stipend Application*. Students are encouraged to use the guide when completing the application, especially the essays in Part III. The essays are based on the objectives of the State's Stipend Program which are further explained in the guide.

Stipend Orientation Sessions

Applicants awarded a stipend will be required to attend a two hour Stipend Orientation Session. The orientation session will describe the stipend program, explain the administration of the program through Phillips Graduate Institute, and review employment requirements in California. The stipend program's Payback Agreement will be reviewed in detail and recipients will be required to sign the Payback Agreement. A Stipend Orientation Session will be held at each regional Consortium. Failure to attend the orientation or to arrive on time will result in forfeiture of the stipend. The date and time of the Stipend Orientation Session will be provided on each region's application form.
